MOCCAMASTER

FOR THE REAL TASTE OF COFFEE

MOCCAMASTER

FOR THE REAL TASTE OF COFFEE

THE BEST FOR YEARS

The quality of a cup of coffee not only depends on the coffee beans, the coffee maker also has a lot of influence on the taste. Moccamaster has long been known as the coffee machine that makes the tastiest filter coffee.

BARISTA QUALITY

The SCA (Specialty Coffee Association) has been using Moccamaster filter coffee machines for many years for the championships in cup-tasting. For this competition it is necessary to distinguish the purest taste of coffee.

TASTY AND HEALTHY COFFEE

With Moccamaster, you always make the finest cup of coffee with the perfect temperature and a full taste. Did you know that filter coffee is also the healthiest way to drink coffee? The paper filter removes the harmful substance cafestol (which increases your cholesterol levels) from the coffee. This way you not only enjoy the tastiest, but also the healthiest coffee!

FOR EVERY SITUATION

Thanks to our wide product range, there is a Moccamaster for every desired situation. The range consists of different models and many colours. A Moccamaster will always suit you, at home and at work alike.

WHAT IS PERFECT COFFEE?

A careful balance between temperature and saturation time is essential for an optimal coffee taste.

TEMPERATURE

If the coffee tastes bitter, the water temperature is too high. If the coffee tastes sour, then the water is too cold. The optimum brewing temperature is between 92 and 96 °C. At this temperature the aroma-containing oils dissolve well, with an ideal balance between sweet, sour and bitter. The unique Moccamaster heating element, made from copper, ensures this ideal brewing temperature.

SATURATION TIME

The correct saturation time is also important. For a full jug (10 cups) the correct saturation time is 6 minutes. At the beginning the sour flavours are released, at the end the bitter substances. If the extraction time is too short, the coffee will taste sour; if the brewing process takes too long, the coffee will taste too bitter. A Moccamaster brews 1.25 l in precisely 6 minutes. The KBG Select also makes less coffee with the correct saturation time.

SUSTAINABLE CHOICE

THE RIGHT MATERIALS

Moccamaster coffee makers are built to last and are made of high-quality and recyclable materials. All plastics are BPA, BPF, BFS and phthalate free.

SPARES AND REPAIR

You can enjoy your Moccamaster for decades. All spare parts such as jugs, covers and filter baskets remain available, so that you can keep your machine complete for many years or you can have it repaired.

ENVIRONMENTALLY FRIENDLY

Due to the good quality, your Moccamaster will last for years. In addition, filter coffee is more environmentally friendly than other brewing methods: the coffee residue is compostable.

Moccamaster is the sustainable choice for the tastiest coffee!

ECBC CERTIFICATION

All Moccamaster machines are certified by the ECBC (European Coffee Brewing Center) and SCA (Specialty Coffee Association). Moccamaster meets the strict requirements for making the best cup of coffee.

Sustainability is of paramount importance at Moccamaster. All machines are made from high-quality and safe materials.

Moccamaster brews coffee with the perfect temperature between 92 and 96 ° C.

Moccamaster brews the coffee almost silently.

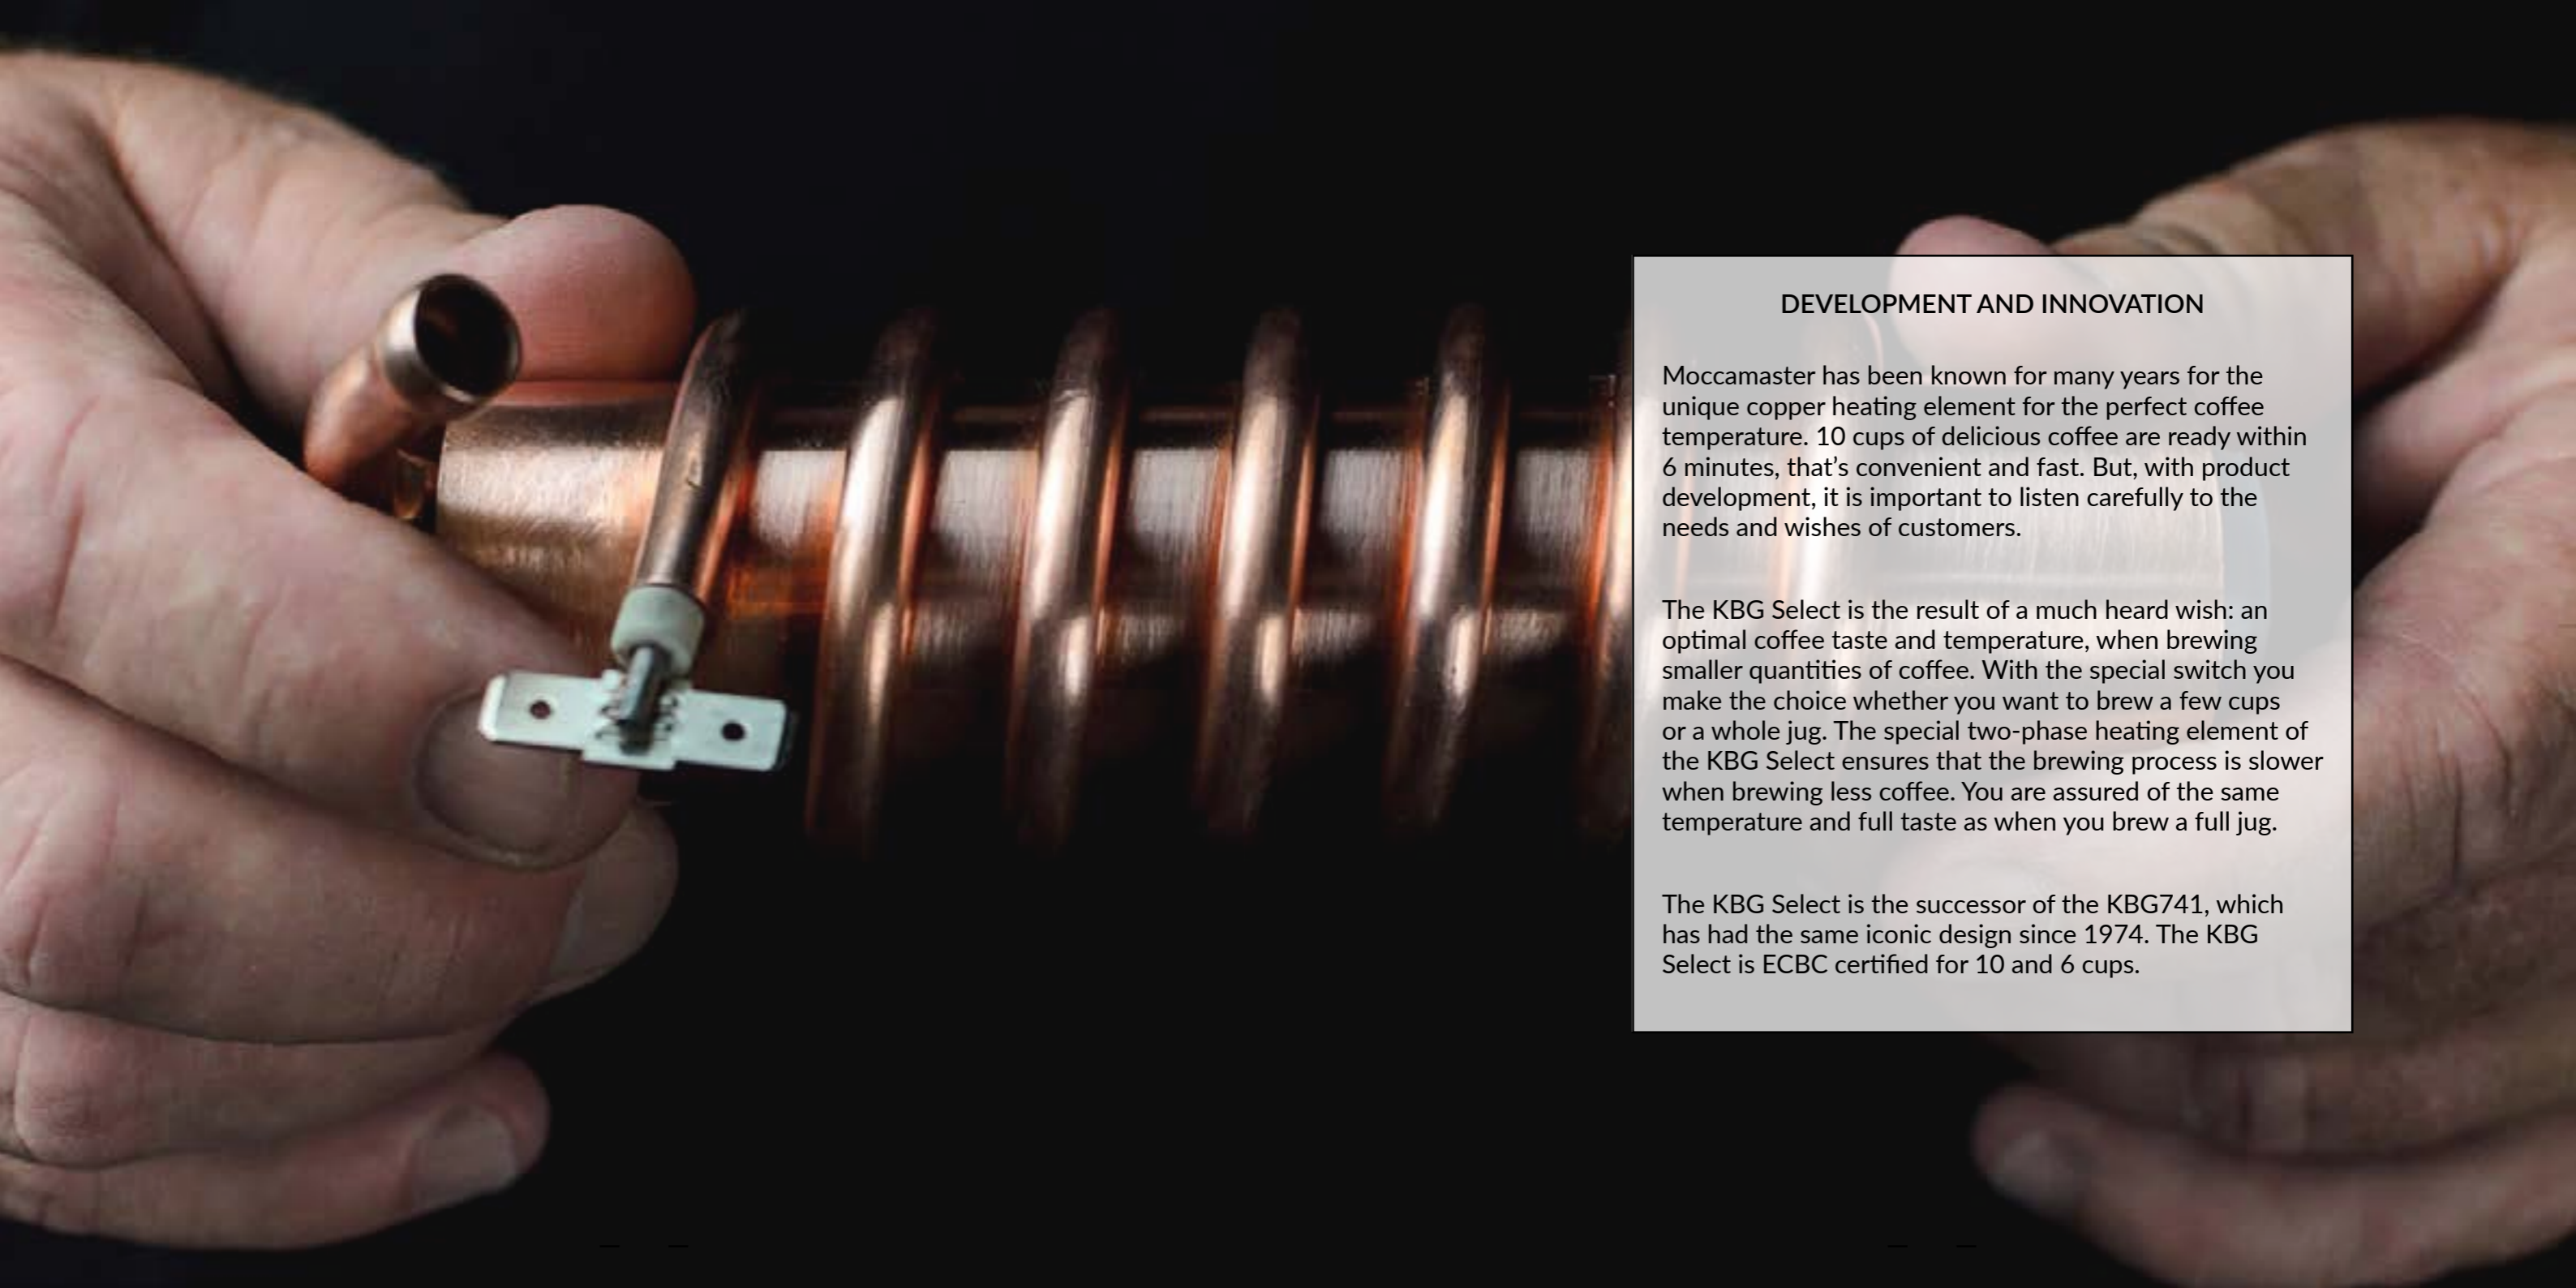

Moccamaster machines have been made by hand since 1968 by Technivorm in the Netherlands.

Moccamaster devices are certified by the European coffee organization ECBC.

As a guarantee for the strong and good product quality, all Moccamaster machines have a 5 year warranty.

DEVELOPMENT AND INNOVATION

Moccamaster has been known for many years for the unique copper heating element for the perfect coffee temperature. 10 cups of delicious coffee are ready within 6 minutes, that's convenient and fast. But, with product development, it is important to listen carefully to the needs and wishes of customers.

The KBG Select is the result of a much heard wish: an optimal coffee taste and temperature, when brewing smaller quantities of coffee. With the special switch you make the choice whether you want to brew a few cups or a whole jug. The special two-phase heating element of the KBG Select ensures that the brewing process is slower when brewing less coffee. You are assured of the same temperature and full taste as when you brew a full jug.

The KBG Select is the successor of the KBG741, which has had the same iconic design since 1974. The KBG Select is ECBC certified for 10 and 6 cups.

KBG SELECT SUITABLE FOR MAKING 4 - 10 CUPS OF COFFEE

- Perfect brewing temperature of 92-96 ° C
- 6-10 cups within 6 minutes or 4-6 cups with a slower brewing process
- 9-hole stainless steel flow pipe for optimum water distribution
- Glass jug lid with mixing pipe for homogeneous coffee
- Automatic drip stop when the jug is removed
- Fire protection and energy efficient: after brewing, the heating element switches off
- The hot plate keeps the coffee at 80-85 ° C and turns off automatically after 40 minutes
- Extremely long lasting and 5-year warranty

The colors in this brochure may differ from the relevant color of the machine.
Visit the website www.moccamaster.eu for all available colours.

KBGT THE TRADITIONAL FILTER COFFEE MACHINE WITH THERMOS JUG

- Perfect brewing temperature of 92-96 ° C
- 10 cups (1.25 l) within 6 minutes
- Two lids: a lid with mixing pipe for homogeneous coffee and pouring and a transport lid for complete closure
- Automatic drip stop when the jug is removed
- 9-hole stainless steel flow pipe for optimum water distribution
- Energy efficient: when the water has run through, the heating element switches off
- Extremely long lasting and 5-year warranty

Note: The KBGT is suitable for brewing 10 cups of coffee (1.25 l); if you regularly brew fewer cups, we recommend the KBG Select with glass jug for an optimal coffee temperature.

HANDMADE DUTCH QUALITY

Moccamaster is a Dutch quality product and is handmade by Technivorm in the Netherlands since 1968. Through a combination of craftsmanship, high-quality materials and strict quality requirements, Moccamaster stands for quality and sustainability. Carefully packaged, the Moccamaster machines are sent to all parts of the world.

YOUR OWN FILTER COFFEE, DIRECTLY IN THE MUG

THE RENOWNED CUP OF FILTER COFFEE, ALSO AT WORK

CUP-ONE

- 300 ml within 4 minutes
- Pulsating heating element for optimum water / coffee contact time
- Brewing temperature 92-96 ° C and coffee temperature 80-85 ° C
- Switches off after brewing
- Includes two porcelain mugs and 80 filter bags
- Environment friendly coffee residue, therefore, less polluting than other single-cup machines

KBG 744

- Perfect brewing temperature of 92-96 ° C
- 20 cups within 6 minutes (160 cups or 20 liters per hour)
- 9-hole stainless steel flow pipe for optimum water distribution
- Lid with mixing pipe for homogeneous coffee
- Automatic drip stop when the jug is removed
- Fire protection and energy efficient: when the water has run through, the heating element switches off
- The hot plate keeps the coffee at 80-85 ° C
- Both sides can be used independently of each other
- Long lasting and 2 year warranty

KBGT 20

- Perfect brewing temperature of 92-96 ° C
- 20 cups within 6 minutes (160 cups or 20 liters per hour).
- 9-hole through-flow pipe for optimum water distribution
- Two lids per jug: lid with mixing pipe for homogeneous coffee and pouring and a transport lid for complete closure
- Automatic drip stop when the jug is removed
- Both sides can be used independently of each other
- Long lasting and 2 year warranty

MOCCAMASTER GRINDERS AND MACHINES: A GOOD COUPLE

- Moccamaster grinders give an even filter grind and are quick and easy to operate.
- The bean container and the grinding chamber are separate. The coffee beans are not heated by the grinding temperature and therefore do not lose any aroma, as is the case with conventional blade grinders.
- The blade works like a propeller, which blows the ground coffee evenly through the fine stainless steel strainer. The ground coffee no longer comes in contact with the blade.
- 5 year warranty

KM4 Table Top

You can easily move this table model or store it in a cupboard if you need more space on the kitchen counter.

KM/DOS

Grind beans and dose coffee with one device, which is mounted on the wall. 12 g of coffee can be dosed per click, directly into the filter basket, without spilling. The ground coffee does not come in contact with the outside air.

KM4

A compact coffee grinder that requires little space on the wall.

DOS Dispenser

This dispenser is mounted on the wall, to be used as a coffee canister for ground coffee. With each click you dose 12 g in the filter holder, without spilling ground coffee.
