

Espresso Extraction Checks

As a barista it is important that you brew espresso according to your set recipe. Keeping the recipe consistent throughout the day is vital. Coffee beans in the grinder react with the environment. Adjusting your grinder settings accordingly throughout the day is therefore an ongoing task.

DOSE: the weight of the ground coffee, i.e. 16 grams

EXTRACTION TIME: the amount of time the espresso extracted for including pre-infusion time, i.e. 27 seconds

ESPRESSO WEIGHT: the actual weight of the liquid, i.e. 32 grams

GRIND SETTING: the number on the grinder for the grind

GRINDING TIME: the set time to grind the dose (for on-demand grinders only)
